SUMMARY

Software engineering graduate with experience in full-stack development, backend systems, open-source contributions, and collaborative technology projects. Interested in advanced study involving software engineering, scalable systems, software security, and technology-driven solutions to real-world problems.

EDUCATIONAL BACKGROUND

African Leadership University – Kigali, Rwanda

September 2022 – July 2026

BSc Software Engineering (Full Stack)

Relevant Coursework: Python, JavaScript, Advanced backend development, DevOps

PROFESSIONAL WORK EXPERIENCE AND PROJECTS

Frontend Developer (remote)

Sept 2025 - July 2026

ProHealium - Accra, Ghana

- Collaborated with a diverse team to build a user-friendly pharmacy management platform that enables pharmacies to record sales, manage inventory, and analyze profits and expenses, supporting ProHealium's mission to enhance healthcare delivery through technology.
- Utilised NextJS, Shadcn ui, and Tailwind CSS

SeedLinq web app

July - August, 2025

- Developed SeedLinq, a full-stack platform connecting farmers or agricultural entrepreneurs with investors through project listings, investment opportunities, and secure proposal screening.
- Built with React.ts & Tailwind CSS on the frontend, and Django & PostgreSQL on the backend.

Frontend Developer Intern (remote)

Jan 2024 – April 2024

Odeen Microsystems, LLC – Boston, USA

- Collaborated with a diverse team to build Odeen's official website, using React, Tailwind CSS, and the Mantine library based on provided UI designs.

Rise farmer360 web app

December 2023

- Collaborated with peers to develop a web application featuring a marketplace, a chat room for information exchange, and live weather forecasts specifically designed for farmers.
- Utilised HTML, CSS & JS for frontend and Node.js & MongoDB for backend development.

PinkRibbon mobile App

August, 2024

- Led a team of three to develop an app for our trimester's final project, aimed at educating people about breast cancer and providing guidance on self-examination techniques, using Dart/Flutter and Firebase.

OPEN SOURCE AND COMMUNITY ENGAGEMENT

Djangonaut Space

March - April, 2026

1 PR Merged

- Participated in a structured 8-week mentorship cohort pairing contributors with experienced Django maintainers; engaged in weekly check-ins, code reviews, and community discussions to develop open source collaboration practices

- PR#89 Worked on Picked up an open issue in **djangoCMS_stories** where `date_published` and `date_published_end` were never set on `publish/unpublish`; traced the cause through `djangoCMS-versioning`'s signal architecture, authored `signal_handlers.py`, and wired it into `BlogAppConfig.ready()`, approved by maintainers, awaiting merge

Hacktoberfest 2025

October 2025

2 PRs merged

- PR#10 Built a country selection dropdown component (70+ countries) with dynamic rendering via `.map()` for a Workshop Registration page; improved dialog responsiveness with adaptive width breakpoints and vertical scroll handling for small screens for **DjangoCampus**
- PR#13 Replaced social media icons with Lucide icons; added ARIA labels for accessibility and screen reader support; refactored quick links to array-mapped rendering; improved text overflow handling on larger viewports for DjangoCampus

PYCON 2026 Organizer

June 2026 - Aug 2026

PYCON Ghana – Accra, Ghana

- Collaborated with the Attendees and Registration Team to define, review, and iterate on operational requirements and deliverables the team needs.

Social Media Coordinator volunteer

October 2025 - Present

DjangoCampus – Accra, Ghana

- Advertise campus programs and manage content across multiple social media platforms to increase community engagement and highlight DjangoCampus activities.

SKILLS

Languages: JavaScript, TypeScript, Python, Dart

Frameworks: Django, React, Next.js, Flutter

Web & Styling: HTML, CSS, Tailwind CSS

Databases: PostgreSQL, Firebase

Tools: Git, GitHub

Soft skills: Adaptability, Problem Solving, Teamwork, Communication

INTERESTS

● Software Engineering

● Backend Systems

● Systems Security

● Technology for Agriculture
